## **Data collected**

Here we list the names of the *Wikipedia* pages for which we collected data on page views and edits in our study. All names relate to pages on the English *Wikipedia*, <http://en.wikipedia.org/>.

### *Pages relating to companies*

This is a list of the *Wikipedia* pages relating to the 30 companies which formed the Dow Jones Industrial Average in April 2012.

View counts were downloaded from <http://stats.grok.se/> on 4 and 8 July 2012. Edit counts were retrieved directly from *Wikipedia* on 8 July.

1. *Alcoa*
2. *American Express*
3. *Boeing*
4. *Bank of America*
5. *Caterpillar Inc.*
6. *Cisco Systems*
7. *Chevron Corporation*
8. *DuPont*
9. *The Walt Disney Company*
10. *General Electric*
11. *The Home Depot*
12. *Hewlett-Packard*
13. *IBM*
14. *Intel*

15. *Johnson & Johnson*
16. *JPMorgan Chase*
17. *Kraft Foods*
18. *The Coca-Cola Company*
19. *McDonald's*
20. *3M*
21. *Merck & Co.*
22. *Microsoft*
23. *Pfizer*
24. *Procter & Gamble*
25. *AT&T*
26. *The Travelers Companies*
27. *United Technologies Corporation*
28. *Verizon Communications*
29. *Walmart*
30. *ExxonMobil*

#### *Financially related pages*

This is a list of the names of 285 pages relating to general economic concepts, as listed in the subsection “*General economic concepts*” on the English language *Wikipedia* page “*Outline of economics*”. The list of terms was retrieved from the URL [http://en.wikipedia.org/wiki/Outline\\_of\\_economics](http://en.wikipedia.org/wiki/Outline_of_economics) on 5 July 2012.

View counts were downloaded from <http://stats.grok.se/> on 6 July 2012. Edit counts were retrieved directly from *Wikipedia* on 8 July 2012.

1. *Agent (economics)*
2. *Aggregate demand*
3. *Aggregate supply*
4. *Agricultural policy*
5. *Antitrust*
6. *Arbitrage*
7. *Balance of trade*
8. *Big Mac Index*
9. *Big Push Model*
10. *Black market*
11. *Business cycle*
12. *Canadian and American economies compared*
13. *Capital (economics)*
14. *Capital asset*
15. *Capital intensity*
16. *Capitalism*
17. *Cartel*
18. *Cash crop*
19. *Catch-up effect*
20. *Central bank*
21. *Chicago school (economics)*
22. *Classical economics*
23. *Collective action*
24. *Collusion*
25. *Commodity*
26. *Commodity markets*
27. *Community currency*
28. *Comparative advantage*
29. *Competition*
30. *Complement good*

31. *Complementarity*
32. *Consumer*
33. *Consumer and producer surplus*
34. *Consumer price index*
35. *Consumer theory*
36. *Consumerism*
37. *Consumption (economics)*
38. *Cost*
39. *Cost-benefit analysis*
40. *Cost-of-living index*
41. *Cost-of-production theory of value*
42. *Currency*
43. *Debt*
44. *Decentralization*
45. *Deflation (economics)*
46. *Depression (economics)*
47. *Devaluation*
48. *Disinflation*

- 224. *Tom Hooper*
- 225. *Tom Welling*
- 226. *Ulrich Mühe*
- 227. *Verna Fields*
- 228. *Vidya Balan*
- 229. *Vikram*
- 230. *Vivien Leigh*
- 231. *William Hanna*
- 232. *Wim Umboh*
- 233. *Winona Ryder*

### **Data pre-processing**

Data on views and edits of *Wikipedia* pages were pre-processed for analysis. Data on views of *Wikipedia* pages were retrieved from <http://stats.grok.se/>. Preliminary analysis of the data revealed some periods for which no page views were reported for any pages in the analysis and nearby periods where recorded page views were abnormally low across all pages, suggesting periods of system downtime. To exclude these days in a systematic

manner, we therefore removed days from our analysis where no page views were reported for any of the pages analysed, or where the total number of views across all pages in the data set had fallen to below 2 standard deviations of the mean daily total views. For each of the three data sets, 30 days were removed due to no page views being reported across all pages. For the company page data set, 12 days were removed due to the total number of page views falling below the 2 standard deviation threshold. For the financial topic data set, 20 days were removed for this reason, and for the actors and filmmakers data set, 5 days were removed. We then calculated the mean number of daily page views for each week, where excluded days did not contribute to this mean calculation. For all datasets, out of 229 weeks analyzed, the two weeks beginning on Monday 14<sup>th</sup> July 2008 and Monday 21<sup>st</sup> July 2008 did not have any data for page views. The mean for these weeks was recorded as a missing value.

Data on edits of *Wikipedia* pages were retrieved directly from the related *Wikipedia* revision history page, and aggregated to determine the mean number of daily edits for a week.

### SUPPLEMENTARY FIGURE:

**Figure S1. Effect of  $\Delta t$  on strategy returns.** We investigate how the size of returns from the trading strategies based on changes in views of the 285 financially related *Wikipedia* pages is affected by  $\Delta t$ . The mean return from trading strategies in standard deviations of random strategies is shown for  $\Delta t = 1$  to 10 weeks. Error bars show the standard error around the mean. Whilst the mean return of the strategies does differ significantly for different values of  $\Delta t$  ( $\chi^2 = 93.26$ ,  $df = 9$ ,  $p < 0.001$ ; Kruskal-Wallis rank sum test), the mean return is greater than 0 at all values of  $\Delta t$  (all  $W_s > 1950000$ , all  $p_s < 0.001$ ; all two-tailed two-sample Wilcoxon rank sum tests, using comparisons to the random strategy distribution for the whole period).
